

Training Guide

Thank you for choosing ONME™, the future of clothing ecommerce. Utilizing ONME™ for your shopping needs is simple and easy. This guide will provide an overview of the different aspects of ONME™ and how to use them for your needs.

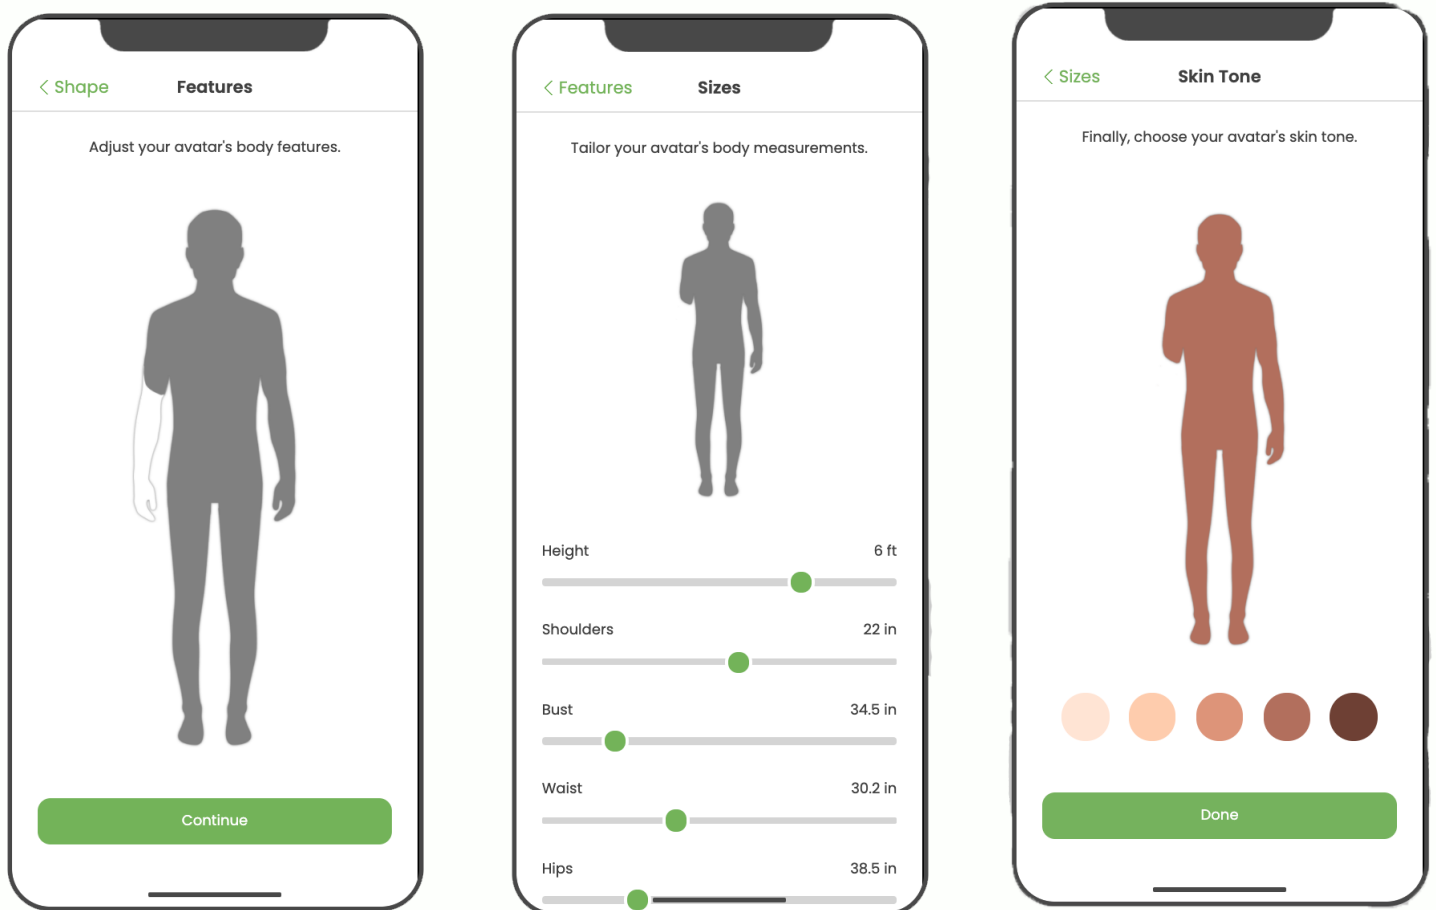

Creating Your Avatar

ONME™'s avatar personalization has been designed to offer the easiest methods to create your perfect self-model. Upon opening the app for the first time, you will be prompted to create your avatar.

Once a body type is selected, you will be prompted to adjust your avatar's features. This consists of the number of limbs you want shown on your avatar, then measurements of your height, shoulders, and bust sizes utilizing sliders. The specific numerical measurement you slide to will be shown above their respective slider.

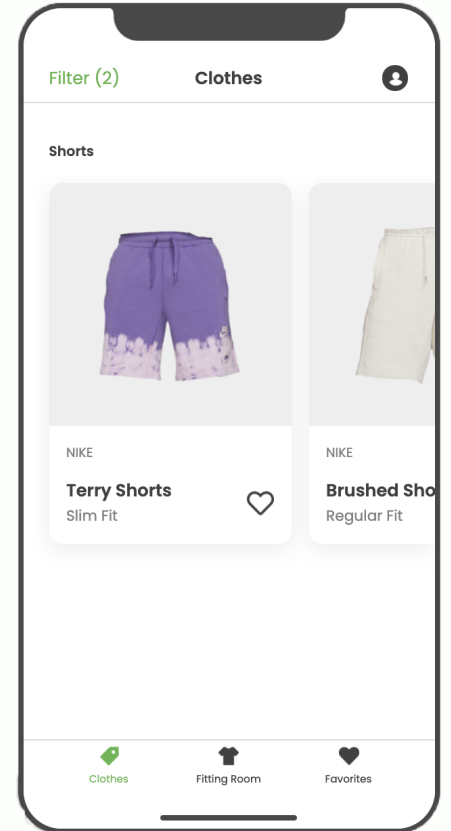

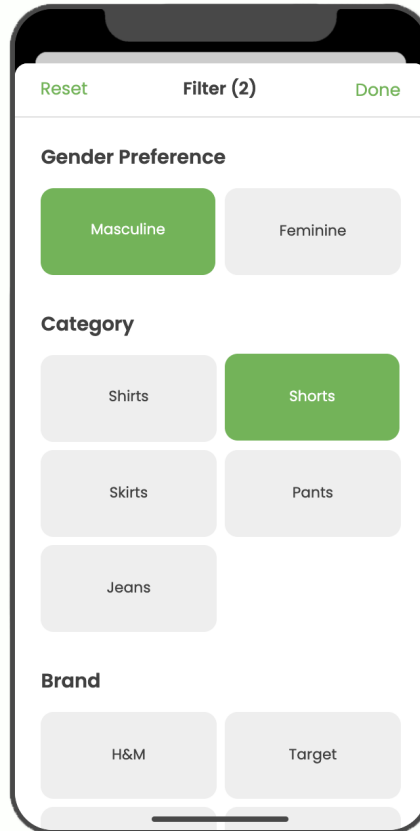

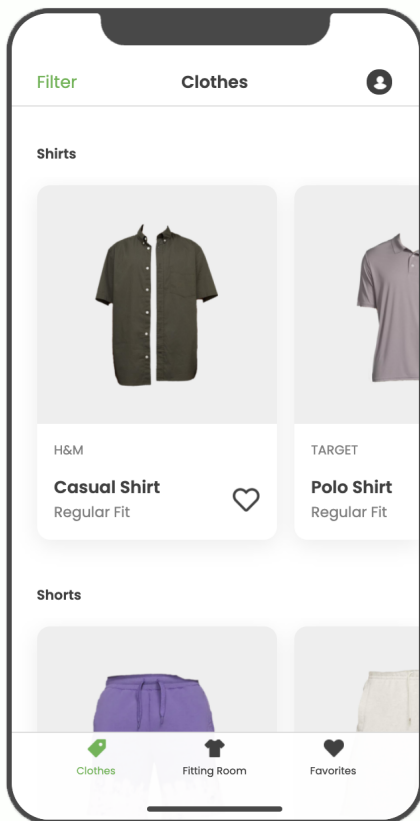

Once these steps are complete, you will then be prompted to edit the skin color.

After reviewing the end result of your adjustments you can go back to make further edits or accept the finished avatar. The avatar will be shown in the Fitting Room tab. After the initial creation phase your avatar will be editable in the Profile section of the app.

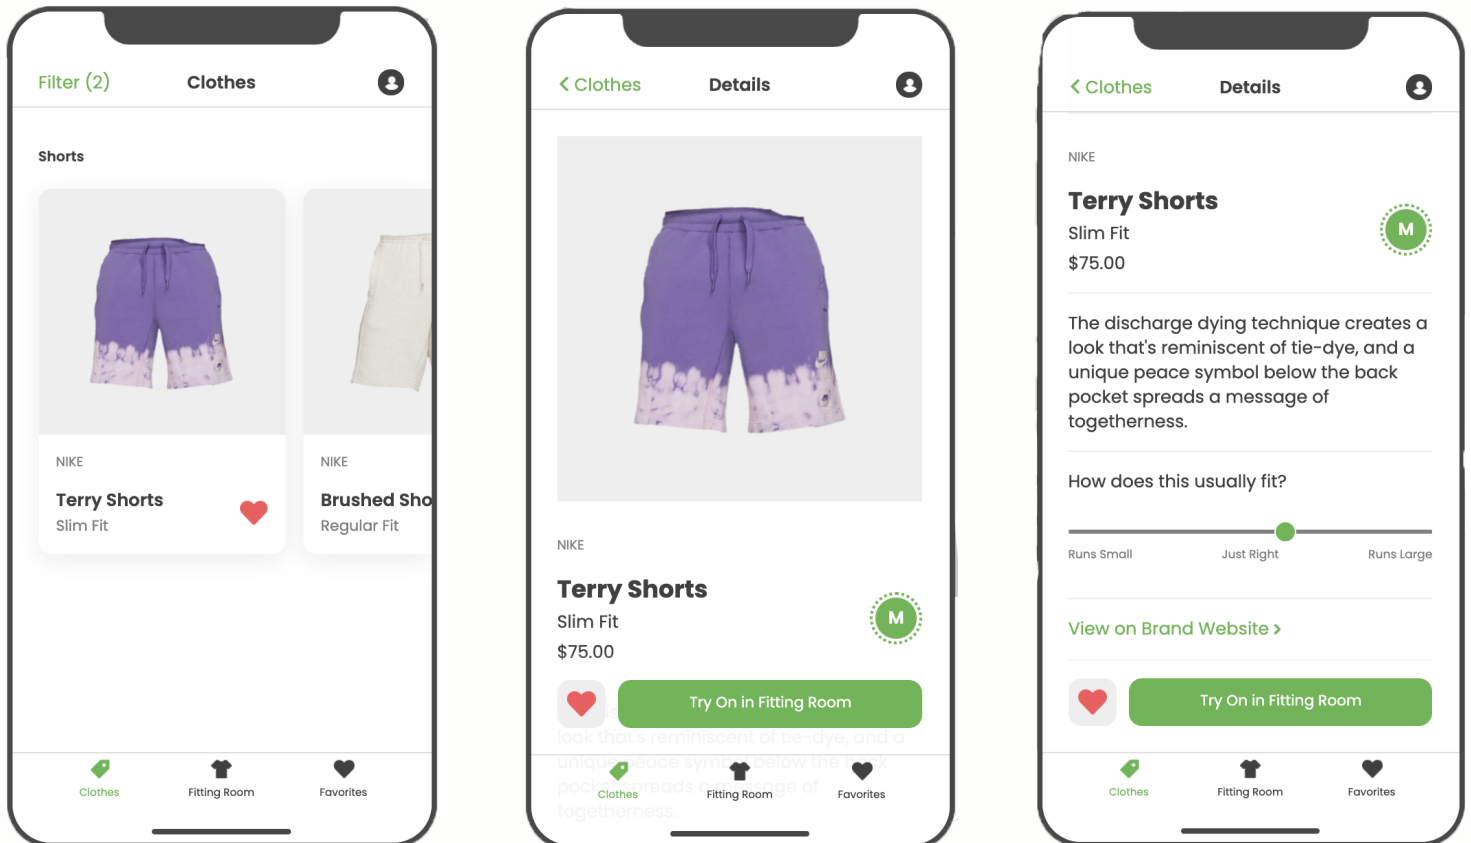

Browsing and Favoriting Clothing

It's easy to find and keep track of clothes that you'll love in ONME™. To specify what type of clothing you want to show in your searches you can access the filter at the top of the screen and select which clothing should be shown. Multiple selections can be made at a time to reduce the amount of items seen for each individual filter section.

Favoriting clothing can be done by hitting the heart icon featured on each item in the clothes. When you favorite an item it will be shown in the Favorites tab of the app.

Clicking on clothing items allows you to see your recommended size, the retailer's price and description of the clothing, images of the item, and more. Expanding a clothing item for details also allows you to send the item to your Fitting Room to try on or view the item directly from the retailer selling the item.

Choosing to purchase the item will take you to the respective store selling the item to complete the purchase.

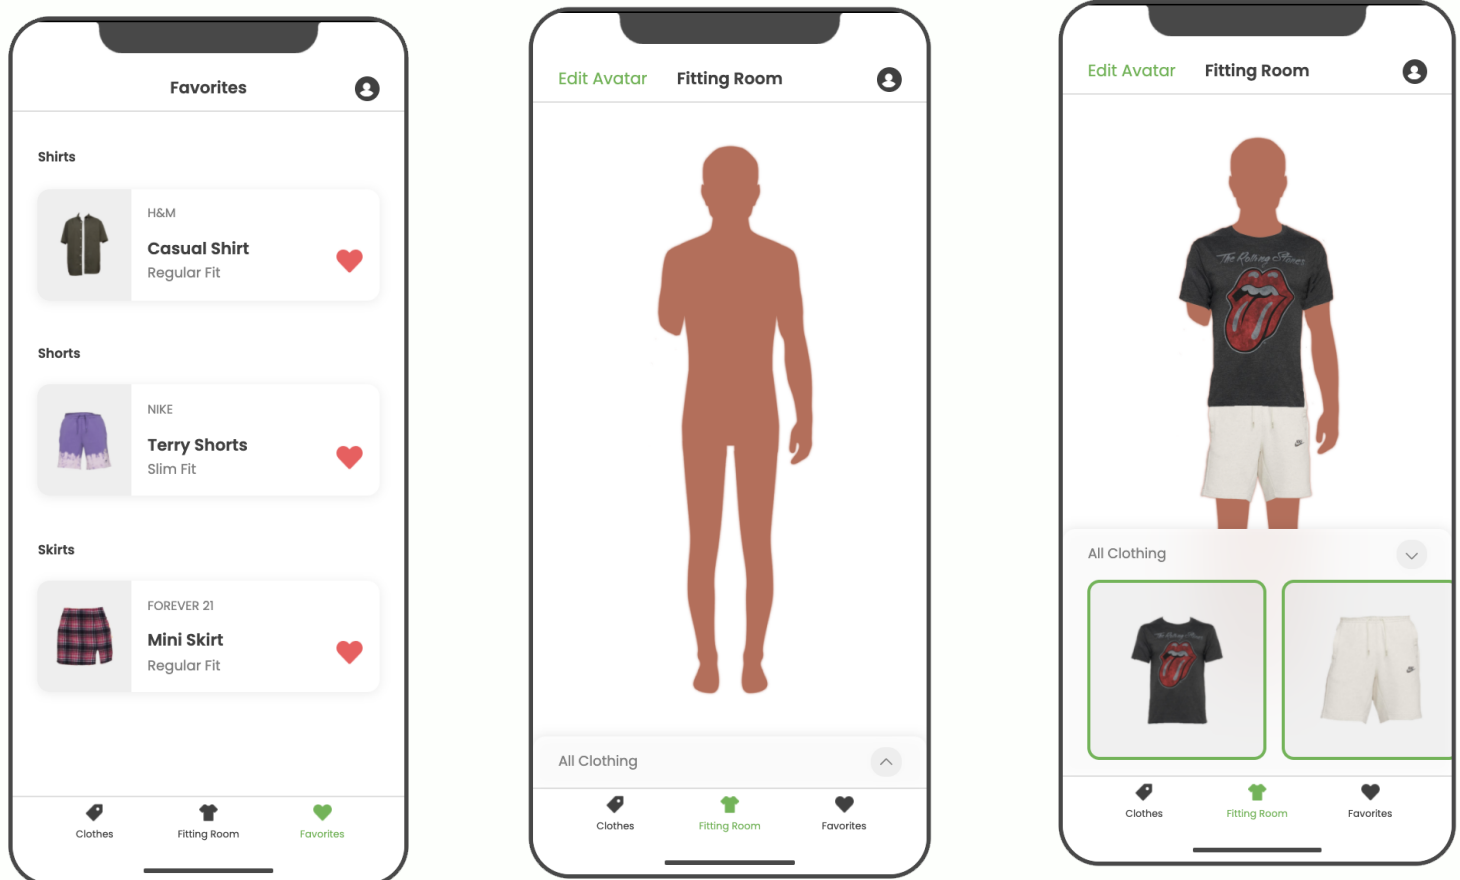

Using the Favorites Tab

Favorite clothing is displayed in the Favorites tab and displays clothing items in their respective clothing categories. To remove an item from your favorites list, simply press on the heart icon to unfavorite the item and it will be taken out of your favorites inventory on refresh.

Using the Fitting Room

The Fitting Room is where you can view your avatar in the clothes you've selected from the Clothes and Favorites tabs.

Clicking on the lower sub-tab shows all items added to the Fitting Room. To sample items on your avatar click the item's icon and it will generate into the viewer. Note that you cannot purchase items directly from the Fitting Room.

Utilizing Your Profile

Your profile gives you access to helpful features such as saving and editing your avatar after initial creation and seeing your previously entered measurements. Data generated and saved contains the email used to sign up, your username and password, items stored within your favorites tab, and the measurements you listed for your avatar.

The Avatar Adjustments button can be found at the bottom of the profile tab. You will follow steps similar to your initial creation of the avatar and can adjust previously entered measurements and body sizing.
