

Style Guide

This is an example of text arrangement on the app

1. The heading text of the page is 18 px large and bold in a Poppins font.

2. The paragraph/body text of the page is 16 px large in a Poppins font.

3. The text for the bottom navigation bar of the page is 12px large in a Poppins font.

Most of the text will be against a white(#FFFFFF) background in the dark gray color #404340

Text

1 **Casual Shirt**

2 Short-sleeved shirt in cotton poplin.

3 Clothes

This is the color scheme throughout the application

1. This color (`#73B358`) is used to represent the brand and it is used as an accent color throughout the app and shows when an item is selected.

2. This color (`#404340`) is used most throughout the app in text color, icons and other key elements.

3. This color (`#FFFFFF`) is used mostly as the background color throughout the app.

We decided that we did not want to add too many colors to insure the main focus on the app's tools and purpose.

Color

1

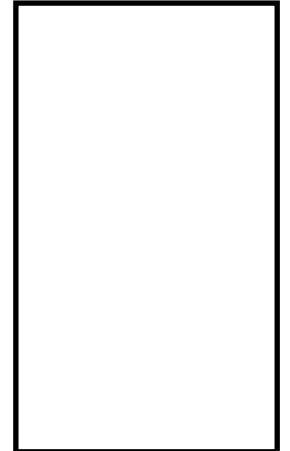

`#73B358`

2

`#404340`

3

`#FFFFFF`

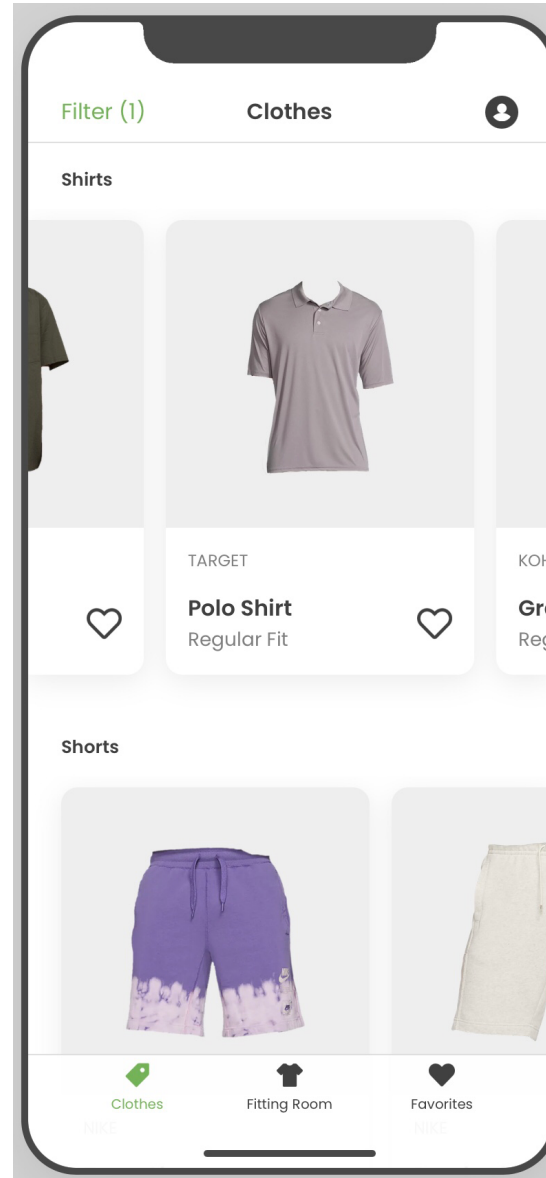

These are the UI Elements used throughout the application

1. Image Carousel - Images of the clothing items will be displayed using a sliding image carousel.

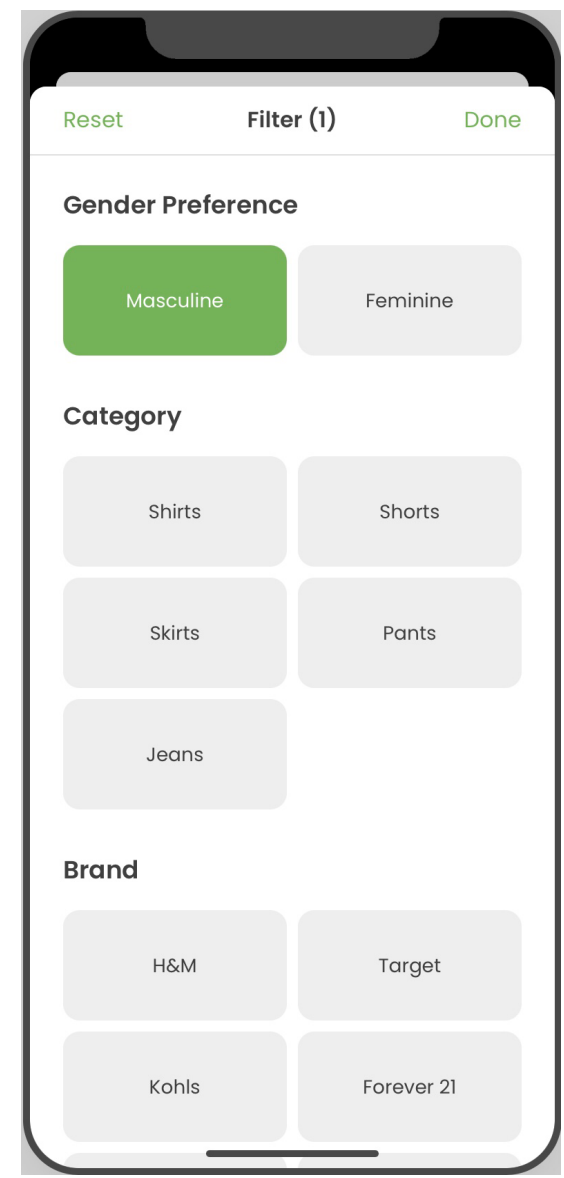

2. Filter - To help users with searching for specific clothing items, we created a filtering section that allows users to select multiple categories and narrow their search. When category is selected it will be highlighted green if not selected it will remain a light gray.

UI Elements
